## Campbell Construction Ltd.

Our next 16 luxury condominium units at 748 Sayward Hill Terrace are well underway and on schedule for completion January 31, 2008. Campbell Construction Ltd. recently completed the final concrete structure and their commitment to quality building is evident again. We congratulate the local company and all of their crews for an excellent job and we're proud to feature Campbell Construction as our Featured Trade in this spring edition of the Outlook Newsletter. Since 1964, Campbell Construction has been making Vancouver Island a finer place to live, work, learn and play. In fact the hundreds of projects successfully completed by this local company form the very heart of vibrant island communities, including Sayward Hill. Campbell Construction Ltd. was established in 1964 as W. Campbell Ltd., formed by William (Bill) Campbell, Ken Farey and Archie Campbell. Each founder began his career as a journeyman carpenter. Solid craftsmanship serves as the foundation of their firm's success. In 1976, Ken Farey became the company's new President under the banner of Campbell Construction. Today Campbell Construction continues under the direction of Ken's son, Wayne Farey, as General Manager/Operations Manager and employs a workforce of over 175. Over the years, Campbell Construction has become an industry leader. Their company has worked in the capacity of General Contractor/Construction Manager to construct literally hundreds of projects – from hospitals to high rise residential buildings and you can get a better view from the Project Gallery on the website at: [www.campbellconstruction.ca](http://www.campbellconstruction.ca). Campbell Construction and Jawl Development Corporation continue to benefit from the knowledge and proven performance record and provide the confidence that their joint commitment to their projects will continue to be completed to the highest standards and on time! We're proud to feature Campbell Construction as our Outlook Featured Trade.
